

SABIS®

*Education for
a changing
world.*

SABIS® is a multi-national education management organization that has successfully operated schools for over 135 years.

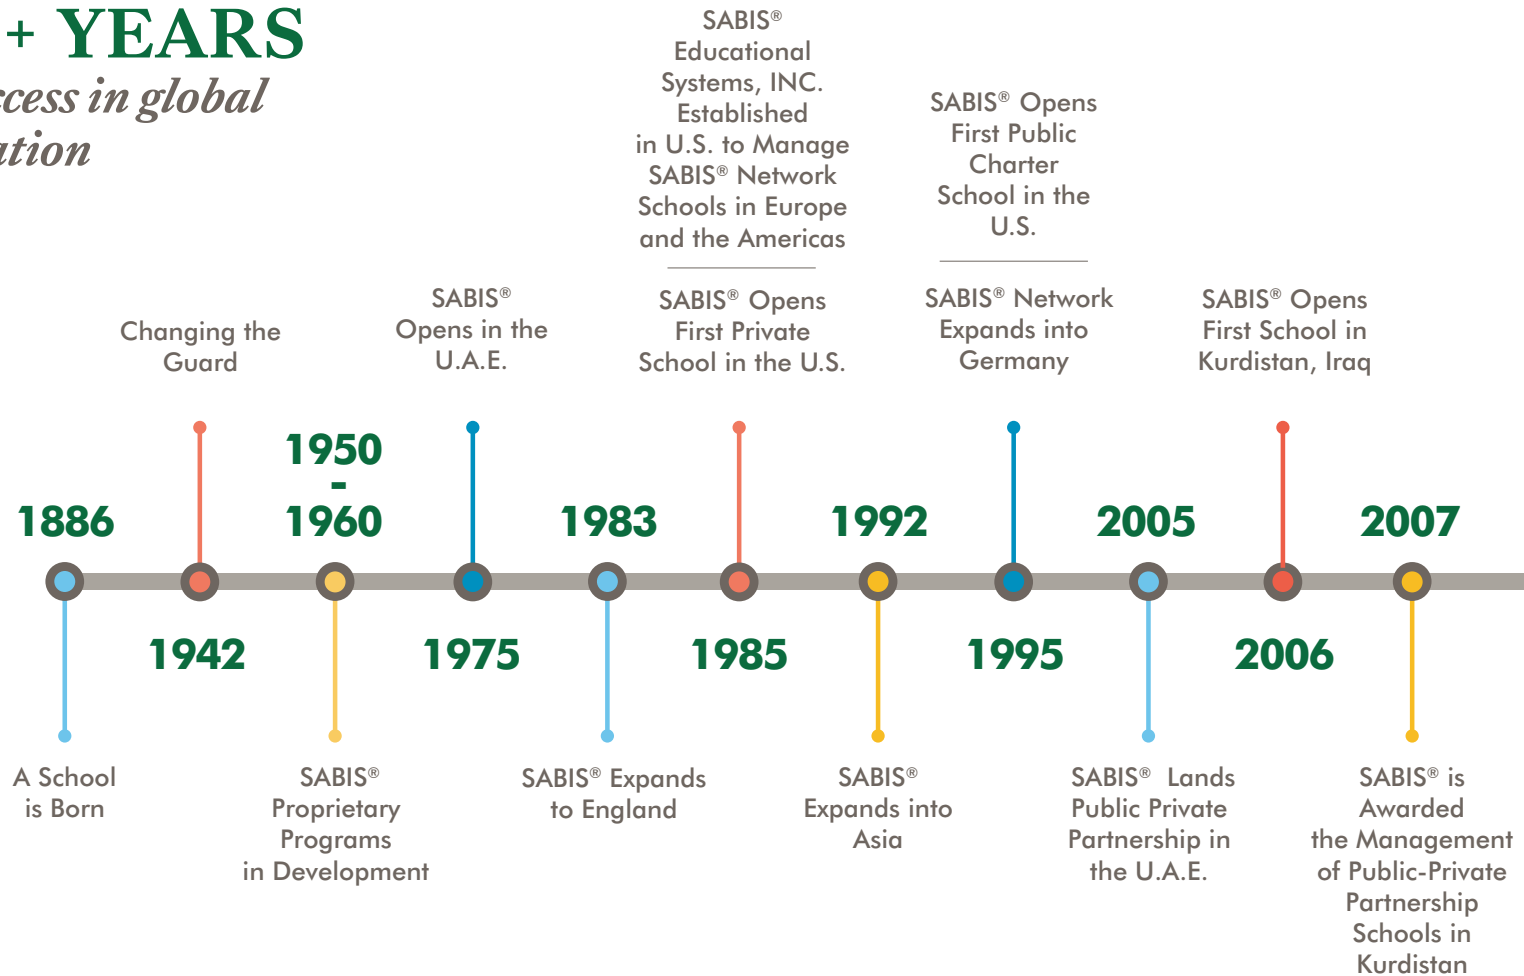

SABIS® delivers a high-quality, K-12 education in English and *prepares students to achieve success in a changing world.*

The SABIS® Network dates back to 1886 with the opening of a small, village school. Today, that school is at the heart of a *global network known for excellence.*

5 continents

20 countries

All schools in the SABIS® Network follow the SABIS® Educational System, a comprehensive, Kindergarten through twelfth grade academic program.

The system uses *dynamic materials, engaging methods, and cutting-edge technology* to prepare students for future success.

SABIS Exploring the World of Science - Level 6
Chapter 3 - Characteristics of Matter

Characteristics of Matter

What

What is matter? Matter is anything that has mass and takes up space. It is made of tiny particles called atoms and molecules. Matter can be solid, liquid, or gas. Solids have a fixed shape and volume. Liquids have a fixed volume but no fixed shape. Gases have neither a fixed shape nor a fixed volume.

ABIS®

Schools in the network benefit from SABIS®'s
commitment to developing *new technologies*
that enhance the learning experience.

Students in SABIS® Network schools acquire:

- *A solid foundation of knowledge*
- *Real life skills and experiences*
- *The ability to engage as independent, lifelong learners.*

SABIS® students achieve outstanding exam results and gain admission to the world's most competitive universities, where they distinguish themselves as *scholars, leaders, and conscientious community members.*

We believe that education has the power to change the world.

We have a variety of operational models to serve all students.

Operational Models:

- **Premium International Schools: Private schools with premium facilities and state-of-the-art campus**
- **CADMUS® International Schools – A Concept by SABIS®: Schools designed to serve aspiring middle-class parents who are both value-conscious and not willing to compromise on quality**

- 
- An aerial photograph of a school sports complex. In the center is a large green soccer field with white markings, surrounded by a red running track. To the left, there are several basketball courts with green and red surfaces. In the background, there is a parking lot filled with cars and a road with trees. The text is overlaid on the soccer field and track area.
- **Public-Private Partnerships: Government-owned schools that implement the SABIS® Educational System and are managed by SABIS®**
 - **Licensing: The SABIS®'s licensing program grants existing schools the rights to use the SABIS® Educational System within the schools' own management structure and philosophy**
